About

The Summit Cantilever Umbrella with Valance is a masterpiece of design and functionality tailored to elevate your outdoor space. Crafted with meticulous attention to detail, the Summit Cantilever Umbrella offers a versatile range of sun-shading positions to adapt to any environment seamlessly. Engineered for unmatched versatility, our cantilever umbrellas feature an exclusive rounded, powder-coated aluminum pole mounted on a mobile base, ensuring effortless adjustment and sturdiness with no crank needed. The 10' canopy structure combines fiberglass ribs for flexibility and durability, with four longer ribs crafted from a blend of fiberglass and aluminum for enhanced wind resistance. The canopy and optional trim are available in most of Brown Jordan's fabrics – the pole and base are available in one of our bestselling finishes: Textured Pewter. With 360-degree rotation, adjustable height, and customizable angles, these umbrellas provide maximum sun shading wherever you need it most.
