About

The Summit 9' Hexagon Umbrella is a masterpiece of design and functionality tailored to elevate your outdoor space. Designed for ease and efficiency, our umbrella operates with a simple sliding system to effortlessly open and close the canopy with no crank required. The entire structure—from ribs to poles, handles, and base—is crafted from powder-coated aluminum for maximum resilience and aesthetic appeal. The canopy and optional contrast trim are available in most of Brown Jordan's fabrics with the pole and base available in two of our bestselling finishes: Dove and Textured Pewter. Optional 4" extension kit and push rod are available. Summit Center Post umbrellas feature a 65- or 95-pound base sold separately with optional wheels. The center post slides over the spigot and snaps into place. Its 1.75" diameter pole is compatible with all Brown Jordan tables.
